

Implementation period	2013-2020 rr.
Location	Aiyrtau region, North Kazakhstan oblast
Construction commencement	Q2, 2019
Commissioning	Q3, 2020
Number of workplaces	579

“Samruk-Kazyna Invest” LLP and “Tin One Mining” jointly implement a project for development of a tin deposit and construction of a mining and metallurgical facility with a capacity of 2.0 mln tn of ore per year in Aiyrtau region of North Kazakhstan oblast.

Syrymbet deposit is Kazakhstan’s single and Central Asia’s largest tin deposit. Implementation of the project for domestic production of tin concentrates and fumes, as well as metallic tin will help Kazakhstan to create a new technologically progressive nonferrous metal sub-industry.

“Tin One Mining” is an ore mining company, which is also a subsoil user of a tin deposit according to the subsoil use contract effective till 2028 and concluded with the Government of the Republic of Kazakhstan.

Project is aimed to create a single tin production facility in Central Asia utilizing the most efficient technology and following the best practice ecological standards. Central Asia is a net importer of tin and tin products. That is why “Tin One Mining” is planning to become a leading supplier of the required raw materials for the region and neighboring countries. “Tin One Mining” is a company of “Lancaster Group”.

Эффект от реализации

- Development of one of the world’s largest tin deposits with the reserves amounted to 99.2 mln tn, of which metal tin reserves make up 485.94 thousand tn. It is also expected to extract such associated elements as tungsten, copper, fluorite, etc.
- Attraction of foreign direct investments.
