

## Production of welding electrodes

Period of implementation	Of 2013-2014.
Location of the project	Karaganda
Start of construction	4Q. 2013
Commissioning	4Q. 2014
Number of servant. places	51

LLP «Samruk-Kazyna Invest" and LLC «Asia Invest Group» jointly implement the investment project "Production of welding electrodes." The project provides for the organization of the production of a wide range of welding electrodes and their implementation. The planned plant design capacity is 4,000 tons of electrodes per year.

Currently, the plant produces 15 different brands of electrodes for welding of all basic and some specialized types of steels and alloys: MP-3, MP-3T TAU-12 UONII-13/85 UONII-13/45, UONII-13/55 , TMU-21U, TML-1U, T-590, MC-5, CN-4, NII48G. In the future, the company plans to expand the product range.
